The 76th Report on

# FOOD FROM CONNECTICUT MARKETS AND FARMS 1971

J. Gordon Hanna, Chief Chemist

Since 1896 annual bulletins have been published by this Station showing the examination results for food offered for sale in Connecticut. Such publications of the data for open market purchases are an effective deterrent to fraud and deception. Consumers are invited to use this information to help them compare and then select the most reliable brands and suppliers.

Connecticut towns and dealers from which samples of food have been collected are arranged in alphabetical order. The results of the analyses of the samples are shown and any deficiencies noted. The purpose of this arrangement is to make the information concerning the brands of food and the dealers in the reader's immediate vicinity readily available for assessment of relative reliabilities.

Where historical data over the last eight years is available for the dealers represented in this bulletin, the total number of samples analyzed over this period and the number of such samples found to be objectionable in one or more ways are tabulated. However, it should be understood that completely random sampling is not implied. Many of the food samples were collected because they were already suspect either by inspectors or by consumers. The result is that the ratio of the number of samples deficient to the total number examined is probably higher than it would be if the sampling had been done randomly.

Statute authority for the collection of samples and the prosecution of violators rests with the Commissioners of the Department of Consumer Protection and of the Department of Agriculture. Only officially taken samples submitted by inspectors from these departments are included in this bulletin. The analytical results have been made available to the Commissioners as soon as they are obtained throughout the year to aid them in the enforcement activities. This Station makes no prosecution of violators.

Not listed in this publication are 470 samples of the Connecticut milk supply submitted by the Commissioner of Agriculture for chlorinated pesticide residue analyses. None of these samples contained residues in excess of established tolerances. The significance of traces of residues in milk and other foods is evaluated by comparison with official levels established and periodically reviewed by the U. S. Department of Health, Education and Welfare. The established tolerance levels include at least a 100-fold safety factor based on physiological effects of each pesticide on test animals.

Analyses for adulteration or for conformance to label claims were in many cases the bases for deciding whether or not samples were acceptable. In other cases examinations of products for conformance to Connecticut and Federal definitions and standards of identy were used. Some of the latter requirements which normally do not prescribe label declarations of the ingredients may be of interest relative to the interpretations of the data given.

Frankfurters and bologna are limited to not over 3.5 per cent fillers (such as cereal, starch, flour, soy products and nonfat dry milk), 10 per cent added water, and 200 parts per million nitrite. Hamburg must not contain more than 30 per cent fat, and pork sausage not more than 50 per cent fat. The addition of sulfur dioxide (sulfite) to any meat product is forbidden. Egg noodles must contain at least 5.5 per cent solids of egg or egg yolk. Vitamin D milk is standardized to contain 400 USP units of vitamin D per quart. In general, a product is considered misbranded if the average of weight, measure or numerical count of the contents of six or more packages does not fully equal that stated on the package label.

The analytical work represented by this report was performed by Mrs. R. Barger, L. A. McLean and M. A. Rogers; Miss L. G. Hornig; and Messrs. R. G. Botsford, W. Glowa, L. Hankin, J. J. Hayes, L. G. Keirstead, G. Smith, S. R. Squires, R. E. West, and A. Wickroski. Clerical work and reporting were by Miss B. Lindgren. The bulletin was typed by Ms. C. J. Miller.

A portion of the cover page, and the letter of transmittal of the first Station food report appears on the back cover of this Bulletin.

## ANSONIA

Castle Beverages, 105 Myrtle Ave.

BS-83 Black Cherry Soda, Dietary Beverage. Fat, 0.02% (claimed, no fats); protein, 1.17% (claimed, no protein); carbohydrates, none found (claimed, 1.12% or less); calories per ounce, 1.4 (claimed, 1.25 or less); saccharin, 0.023% (claimed, less than 0.025%).
Deficiency: Excessive protein relative to claim.

BS-84 Root Beer, Dietary Beverage. Fat, 0.02% (claimed, no fats); protein, 0.91% (claimed, no protein); carbohydrates, 0.17% (claimed, 1.12% or less); calories per ounce, 1.1 (claimed, 1.25 or less); saccharin, less than 0.02% (claimed, less than 0.025%).
Deficiency: Excessive protein relative to claim.

BS-85 Orange Soda, Dietary. Fat, 0.03% (claimed, no fats); protein, 1.03% (claimed, no proteins); carbohydrates, none found (claimed, 1.12% or less); calories per ounce, 1.2 (claimed 1.25 or less); saccharin, less than 0.02% (claimed, less than 0.025%).
Deficiency: Excessive protein relative to claim.

BS-104 Dietary Root Beer. Amino acids (glycine), 0.8g per 100g.
Deficiency: Contains an undeclared ingredient.

BS-105 Dietary Cola. Amino acids (glycine), 0.9g per 100g.
Deficiency: Contains an undeclared ingredient.
Previous 8 years: Total samples 11, Samples deficient 0.

C & F Hamburg Co., 45 Jewett St.

JC-99-2 Ground Beef. Fat, 21.4%; sulfite, none found.

CT-99-3 Hamburger. Protein, 18.0%; total water, 65.9%; added water, none found; soy flour, none found; fat, 14.0%; sulfite, none found.
Previous 8 years: Total samples 1, Samples deficient 0.

First National Store, Main St.

BS-39 Chopped Beef. Fat, 24.1%; sulfite, none found.

BS-133 Quaker Oatmeal. No visible foreign material present.

JW-838 Carrots. Chlorinated pesticide residues, within tolerances.
Previous 8 years: Total samples 6, Samples deficient 1.

## ASHFORD

Crooke Orchard, Berington Rd.

JW-1265 Macoun Apples. Pesticide residues, within tolerances.
Previous 8 years: Total samples 1, Samples deficient 0.

## AVON

Avon Cider Mill, Cider Brook Rd.

JW-1436 Cider. Pesticide residues, within tolerances.
Previous 8 years: Total samples 3, Samples deficient 0.

AVON (Cont.)

First National Store, Rt. 44
DL-49 Pillsbury Farina. Examination for visible foreign material, chips of material that are apparently glass found.
Deficiency: Contaminated.

JK-468 Gorton's Alaska Snow Crab. Examination for visible foreign material, none found; condition of can interior, normal.

JK-526 Finast Smoothy Peanut Butter. Visible foreign material, none detected.

RH-28 Welch's Grape Juice. Organoleptic tests, normal.

Fitzgerald's Super Market, Rt. 44
JK-360 Hamburg. Fat, 22.6%; sulfite, none found.

JK-512 Shurfine Grapefruit Sections (two 16-ounce cans). No spoilage or decomposition noted.
Previous 8 years: Total samples 2, Samples deficient 0.

Midi-Mart, West Main St.
JK-550 Progresso Tomato Paste (two 6-ounce cans). Internal gas pressure in both cans; interior lacquer surfaces of cans attacked and pieces of lacquer throughout the paste.
Deficiencies: Chemical attack of can and food contaminated by can material.

Petit's Super Market, West Main St.
JK-379 Hamburg. Fat, 20.5%; sulfite, none found.
Previous 8 years: Total Samples 8, Samples deficient 4.

Pine Grove Farm, 841 West Avon Rd.
JW-1306 McIntosh Apples. Pesticide residues, within tolerances.
Previous 8 years: Total samples 2, Samples deficient 0.

BALTIC

Sunrise Farm Dairy
PG-1533 Milk. Vitamin D content, satisfactory.

PG-4029 Vitamin D Milk. Vitamin D content, satisfactory.
Previous 8 years: Total samples 7, Samples deficient 0.

BANTAM

Avalon Farms, Goslee Rd.
JW-1331 Rome Apples. Pesticide residues, within tolerances.
Previous 8 years: Total samples 3, Samples deficient 0.

Big Value Supermarket, Main St.
JK-425 Cream of Rice. Examination for visible foreign material, none found.

JK-541 Kellogg's Special K. No visible infestation detected.

BANTAM (Cont.)

Big Value Supermarket (Cont.)
JW-671 Idaho Potatoes. Pesticide residues, within tolerances.

Robert Rumpf
JW-1332 McIntosh Apples. Pesticide residues, within tolerances.

Joseph Sawicki, Rt. 25
JW-1245 Corn. Pesticide residues, within tolerances.

BERLIN

Dunham Orchard, Lower Lane
JW-1339 Baldwin Apples. Pesticide residues, within tolerances.
Previous 8 years: Total samples 4, Samples deficient 0.

Food Marts, Inc., 139 Webster Square Rd.
JM-499 Cold Cuts. Organoleptic tests, normal.

VL-341 Ground Beef. Fat, 25.0%; sulfite, none found.

FM-28 Green Giant Whole Kernel White Corn. Interior surface of the can was good.
Previous 8 years: Total samples 31, Samples deficient 12.

Lower Lane Dairy
WP-1602 Vitamin D Milk. Vitamin D content, satisfactory.
